

Acer Gaming 24" G24 LCD Monitor with HDMI

The Acer G24 LCD monitor is designed for the graphics-intensive, win-or-lose moments of today's fastest high-def games.

The well-armored, angular exterior looks fantastic, while the brilliant display with HDMI™ connectivity maximizes multimedia and gaming enjoyment!

Radical design

Acer G24 monitors feature a well-armored, angular exterior similar to the slanted surfaces on military tanks. This warrior-like appearance complemented by the orange-black color scheme and deeply carved lines on the base projects a rugged military look and feel that will surely entice gamers. Control buttons located below the panel enable easy cleaning and intuitive use.

Perfect brightness

Monitors are typically used in normal ambient light with a viewing distance of around 60 cm. The brightness of Acer G24 monitors is engineered for this scenario (400 nits) to deliver optimum brightness for your most common usage.

All-digital HDMI™ interface

Advanced digital HDMI™ connectivity delivers exceptional high-def viewing and gives the highest quality video and audio currently available.

Convenient digital input via DVI with HDCP support

A DVI input maximizes the connection quality between LCD monitors and other digital sources, including PC graphics cards. High-bandwidth Digital Content Protection (HDCP) support ensures enjoyment of full-quality DRM-protected entertainment.

Widescreen enjoyment and productivity

The spacious widescreen display optimizes viewing pleasure.

- Widescreen multitasking at work

- Dual widescreen displays with widescreen notebooks
- Widescreen entertainment and gaming
- Optimized for Windows Vista®

Rapid 2 ms response time

Acer G24 monitors reduce deviations in transition time to deliver high-quality moving images. Acer LCDs feature Acer OD (overdrive) technology, improving the gray-to-gray level, which is the most important factor in the moving-picture viewing experience.

Wide viewing angle gives you the whole picture

A wide viewing angle maintains color consistency and image clarity, allowing you to share content with others without having to crowd in front of the screen, for an excellent viewing experience. Acer leverages three primary technologies to improve contrast ratio performance for viewing an LCD monitor from different angles to present you with a big, lifelike picture.

Superior details via Full HD

The 1920 x 1200 resolution of widescreen monitors makes them perfect for advanced 1080p Full HD gaming and multimedia applications. Enjoy fantastic home entertainment and productivity with Full HD.

- Blu-ray Disc™ console game display
- Easy multitasking and document comparison
- Widescreen cinematic experience

Tested reliability

Acer G24 monitors undergo rigorous durability testing and adhere to high safety standards to ensure that each display is reliable and provides comfortable viewing
