Price : RRP \$3,799*

**Samsung LED TV Series 6
has arrived.**

With sharper images and brighter colours-TV will never be the same.
With smooth, clear lines, an ultra-slim design, and eco-awareness features-you've never seen television like this before.

Picture Quality

Design

Connectivity

Samsung's 'LED TVs' combine LCD screens with LED edge-lights.

There can be only one thinnest, clearest, most elegant television. Easily, it is Samsung's LED TV Series 6. Breathtakingly thin, it's designed as one seamless piece of flawless crystal. On its screen, vivid details are captured in every frame. Picture edge-blur removed and full, robust colour restored to each pixel. Watch television programs knowing you're also being considerate to the environment. It's a remarkable feat of design, on or off.

Picture Perfect

For images that are stunningly true to life you need the 3 Cs: contrast, colour and clarity. LED TV Series 6 has them. Its Mega Contrast Ratio feature brings out all the shades of gray. A Wide Colour Enhancer Pro with LED gamut ensures every entire pixel is robust and vibrant. This enables the TV to display a wider range of natural colours and provide greater depth. Even with subtle colours. Plus our 100Hz Motion Plus technology removes edge-blur. Leaving your picture smooth and crisp.

Depth without depth.

LED TV Series 6 is the slimmest LED television in the world with a integrated digital Tuner built in. Instead of multiple parts moulded together, it's one solid, seamless, incredibly beautiful advanced television. Elegantly supported by a unique crystal neck. You'll have no trouble finding a place for it in any room.

The astonishingly slim LED TV Series 6 is just like a picture frame. Only this frame is made with a touch of colour. We call it Crystal Design. One look is all it takes to see that this isn't just a TV, but a work of art.

Energy efficient

Samsung LED TVs use up to 40% less energy than previous equivalent-sized LCD models reducing your bills and helping the environment.

Slim Wall Mount (sold separately)

The Samsung Slim Wall Mount is a unique patented system that eliminates the complexity of mounting your Samsung LED TV or Series 8 Plasma on the wall. You simply install the wire mounts on the back of the TV with the screws provided as well as a support bracket and spacer enabling you to angle the TV while on the wall for easy access to connect the cables. You then simply screw the 'round' mounting plates on the wall and hang your TV like you would a picture frame! The tungsten support wire is rated to a weight of 200kg – more than adequate to support the weight of your Samsung TV.

The slim wall mount pack also includes everything you need to wall mount including the wall toggle plugs for gyprock and screws for concrete walls. The Samsung Slim Wall Mount gives you a very clean installation with the total depth from the wall of around 15-30mm for a classy finish that will have you admiring your Samsung TV at every opportunity.

Part number:

WMN1000B – for Samsung LED TV models (Series 6, Series 7, and Series 8) and Series 8 Plasma TV (50" only)

WMN1000C – for Samsung Series 8 Plasma TV (58" only)

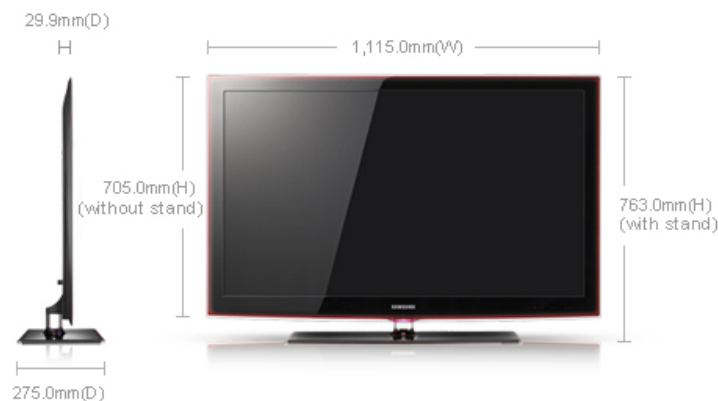

4 HDMI

HDMI inputs transmit pure, uncompressed streams of digital data at the highest resolution. With 4 HDMI inputs, the LED TV Series 6 is equipped with everything it needs to become your personal multimedia hub, allowing you to quickly connect external devices to the TV for an unrivalled audio visual experience. The addition of Universal Anynet+ allows you to control all connected audio and video devices from one remote control, giving you a more integrated entertainment experience.
