

**Samsung LED TV Series 8
has arrived.**

With sharper images and brighter colours-TV will never be the same.
With smooth, clear lines, an ultra-slim design, and energy efficient features-you've never seen television like this before.

Samsung's 'LED TVs' combine LCD screens with LED edge-lights.

There can be only one thinnest, clearest, most elegant television. Easily, it is Samsung's LED TV Series 8. Breathtakingly thin, it's designed as one seamless piece of flawless crystal. On its screen, vivid details are captured in every frame. Picture edge-blur removed and full, robust colour restored to each pixel. Watch television programs or web content knowing you're also being considerate to the environment. It's a remarkable feat of design, on or off.

Picture Perfect

For images that are stunningly true to life you need the 3 Cs: contrast, colour and clarity. LED TV Series 8 delivers them. Its Mega Contrast Ratio feature brings out all the shades of gray and Wide Colour Enhancer Pro with LED gamut ensures every entire pixel is robust and vibrant. Together they enable the TV to display a wider range of natural colours and provide greater depth. Even with subtle colours. Plus our 200Hz Motion Plus technology removes edge-blur. Leaving your picture smooth and crisp.

Depth without depth.

LED TV series 8 is the slimmest LED television in the world with a integrated digital Tuner built in. Instead of multiple parts molded together, it's one solid, seamless, incredibly beautiful advanced television. Elegantly supported by a unique crystal neck. You'll have no trouble finding a place for it in any room.

The astonishingly slim LED TV Series 8 is just like a picture frame. Only this frame is made with a touch of colour. We call it Crystal Design. One look is all it takes to see that this isn't just a TV, but a work of art.

Energy efficient

Samsung LED TVs use up to 40% less energy than previous equivalent-sized LCD models reducing your bills and helping the environment.

200Hz Motion Plus

There's a big difference between seeing the game and seeing every split second of it. That's where 200Hz Motion Plus technology comes in. All the action in every frame is analysed and then adjusted so nothing goes by in a blur. From watching your favourite sports to watching your favourite movies, the action is always smooth, sharp and fluid.

Wide Colour Enhancer Pro

The challenge of any TV screen is to recreate reality through colour and light. We met this challenge with our Wide Colour Enhancer Pro feature. After analyzing each pixel, it stretches them to their 3-dimensional limit. What you get is the fullest, most lifelike colours you've ever seen-on a TV that is.

Getting on TV made easy.

LED TV Series 8 takes the struggle out of sharing your talent with the world, or at least with your family. Transfer your videos, music and photos from your PC or from your DLNA mobile device. Wirelessly and effortlessly. It even connects with multiple PCs. Who said you need connections to get on TV?

Your audience awaits.

There's no excuse anymore for leaving all those great digital pictures and videos in your cameras. All you need with the LED TV Series 8 is a USB 2.0 cable. Just plug it in then instantly, play, save or delete. It even works with your music collection. So now anytime is showtime.

Library hours extended.

Suppose you feel like playing a game of chess or cooking instead of watching TV. LED TV Series 8's Content Library Flash lets you do that too. Create your own content, from children's games to fitness. And downloading is easy. There's so much you can do with LED TV Series 8. Including watching it.

Wireless LAN adaptor (sold separately)

With the Samsung Wireless LAN adaptor you can connect your Samsung TV to your computer network for DLNA and Internet@TV functions. The Samsung Wireless LAN adaptor supports 802.11 a/b/g/n standards and can also be used on dynamic (DHCP) or static IP networks. Wireless security is also covered with support for 64-128bit WEP, WPA and WPA2 wireless security standards. Part Number: WIS09ABGNX/XY Note: The Samsung Wireless LAN adaptor is required to enable wireless networking functionality on your Samsung TV. The wireless networking functions will not work with generic wireless LAN adaptors.

Slim Wall Mount (sold separately)

The Samsung Slim Wall Mount is a unique patented system that eliminates the complexity of mounting your Samsung LED TV or Series 8 Plasma on the wall. You simply install the wire mounts on the back of the TV with the screws provided as well as a support bracket and spacer enabling you to angle the TV while on the wall for easy access to connect the cables. You then simply screw the 'round' mounting plates on the wall and hang your TV like you would a picture frame! The tungsten support wire is rated to a weight of 200kg – more than adequate to support the weight of your Samsung TV. The slim wall mount pack also includes everything you need to wall mount including the wall toggle plugs for gyprock and screws for concrete walls. The Samsung Slim Wall Mount gives you a very clean installation with the total depth from the wall of around 15-30mm for a classy finish that will have you admiring your Samsung TV at every opportunity. Part number: WMN1000B – for Samsung LED TV models (Series 6, Series 7, and Series 8) and Series 8 Plasma TV (50" only) WMN1000C – for Samsung Series 8 Plasma TV (58" only).

4 HDMI

If there's an easier way to get HD video and pictures onto LED TV Series 8 we'd like to know. All it takes is one single HDMI cord and images are transferred without data.

Pebble Shaped Remote Control

Like a precious stone or a sea smoothed pebble, the pebble shaped remote control is an exquisite piece of electronic art. It shines with a rare beauty that enriches its environment, making your world a more beautiful place.
